all is nothing.** Willy Brandt

For more than 20 years, Washington has invested hundreds of millions of Dollars in Nazi groups in Ukraine: through the CIA and other organizations. Both successful coups in Kyiv in 2004 and 2014 are unthinkable without US intervention. The Maidan battle was carried out with great brutality by the CIA station of the US Embassy in Kyiv. There, Maidan leaders appeared daily to report and receive orders. Ever since, Washington is developing Russia's neighbor into a bridgehead in the planned world war: military airports, weapons depots, but also 46 officially acknowledged biological weapons laboratories, research facilities for nuclear weapons and launch sites for short- and medium-range missiles: Russia was unavoidably forced to intervene.

A downright anti-Russian policy bans Russian as the official language and in education, and often bloodily oppresses Russians, especially in Donbass with almost 15,000 fatalities, including nearly 1000 children. Mafia gangs with political backing trade children for prostitution and organs from murder victims on a massive scale.

Zelensky's presidential career is a PR coup by the Zionist oligarch Kolomoisky and his TV station with the popular series „Servant of the People“. Somewhat closer to reality: „Servant of the US Deep State“.

**Stop Global Mass Murder:
War, Corona, Chemtrails, Electro-Smog ...**

Germany's future will not be decided solely in Washington, nor in Bundestag nor by federal government, not even through demonstrations, no matter how large. Nonetheless, we absolutely need all hands and joint efforts!

The decisive factor for our whole future is, whether we succeed in disempowering the global Deep State - global corporate cartels, lodge bosses and masterminds - hopefully forever!

Those, who do not see this corrupt system and do not attack it, must remain politically ineffective in the long run. Above all we deprive the finance cartel of money creation and their deadly interest system, unravel the media cartel and stop its liar propaganda campaigns.

We have vision, plan and means!

DIE NEUE MITTE

Zurück zur Vernunft.

Nuclear War already projected. Crash unstoppable!

Washington's top foreign policy goal since more than 100 years is blocking German-Russian friendship, a friendship able to keep the peace and foster prosperity in Europe and worldwide.

NATO was founded in 1949 „to keep Russia out (of Europe), America in (as a leading power, of course) and Germany down,” according to its first Secretary General, Baron Ismay. In the very same year, the FRG (West) and the GDR (East) came into being. In 1952 the Soviet Union offered Germany unity in neutrality – Washington did not allow this and spread the word, that the Soviet Union could not be trusted. In 1955 the Federal Republic of Germany joined NATO.

Since the end of the Soviet Union, two important treaties have ruled over the future of Europe. 1991: 2+4 treaty for the withdrawal of Soviet troops and German unity in a peaceful way. 1997: NATO-Russia Founding Act: In Europe, neither side was allowed to expand its security at the expense of the other. But NATO pushed east in five waves, 14 new members, disregarding Russia's protests. German arms for Kyiv now break the 2+4 treaty, thus bolstering Russia's legal right to re-occupation: Germany has no peace treaty.

Even before the end of the Soviet Union, the US deep state had its sights firmly set on Ukraine as a bridgehead against Russia. The armed oligarch system was to support this plan, with top ranking for part-time Israeli citizen Kolomoisky. Subjugation of Russia was supposed to work similarly; but oligarch Khodorkovsky, top star for the great coup, failed in 2002 because of Putin. In 2017 Khodorkovsky named racist Navalny as his successor.

War comes, when peace has too little support.

On March 24, 2021, Kyiv president Zelensky issued order 117 for the recapture of Donbass and Crimea by Kyiv's army. Subsequently, Kyiv deployed half of it's standing army, 125'000 troops, in a southeastern belt facing Donetsk and Lugansk. Since summer of 2021, after more than 20 years of breaches of contracts by US-led NATO, Russia's President Putin has been calling for Ukraine without NATO accession and the implementation of the Minsk Agreement. Kyiv had not even completed the first step: direct talks with the renegade Donbass republics! Merkel, Hollande and Johnson have admitted, that Minsk II was a fraud, only to win time for arming Kyiv and war preparation. In February 2022, Kyiv's fire raids against civilians there increased to more than 1400 daily; hit squads were sent out against Lugansk. On February 19, Zelensky announced in his Munich Security Conference (58) speech seeking nuclear armament, NATO guests applauded. Moscow saw the last red line crossed, finally responded on February 21, by recognizing the two People's Republics of Donetsk and Lugansk under international law, and their requests for help were immediately fulfilled. Kyiv continued to murder civilians on high levels, from February 24th Russian troops rolled from three directions all over Ukraine with further demands: demilitarization, denazification, neutral status, recognition of the Russian reunification with the Crimea peninsula and independence of the two people's republics Donetsk & Lugansk.

Russia's troops follow a costly "special operation" strategy: to save as many civilian lives and infrastructure as possible.

Because of the all-out war against Russia with heavy arms support from around 15 states and tens of thousands of mercenaries, mainly from Poland, and global sanctions, Moscow threatened, Ukraine might ultimately lose its

For the first time in the history of mankind, governments strive to destroy their peoples.

statehood: Poland's advances in Ukraine may ultimately draw NATO into the conflict. Moscow alerted its nuclear armed forces; in the meantime, western Ukraine is also being bombed occasionally.

Nobody doubts that Russia will finally win in Ukraine. Western arms shipments only prolong Washington's Slav fratricidal war. It costs tens of thousands of Russian lives, millions of refugees flood neighboring countries. Radical rearmament in Germany, astronomical energy prices due to suicidal Western sanctions, industries stopping operation, supply chains disrupting: This is already costing hundreds of billions of Euros.

Washington's MoD directs war operations in Ukraine down to details, including top secret satellite and other data, using of Elon Musk's Space-Ex satellites, special trainers, military personnel. World War III is only a hair's breadth away, Washington and the European Deep State minions want it! Only nuclear weapons will help Russia against NATO: That means the end of Europe and the world as we know it! Only unscrupulous lackey politicians follow this path all the way down: ours! They all serve the „Great Reset”, their own interests, and jointly harm their own people. These crooks have secured themselves and are well looked after, if necessary abroad. Zelensky's bank accounts in Panama and elsewhere are common global knowledge. He is suspected to being paid on daily basis for every day of senseless prolongation of war.
